LOGNOTE -- Chief, Operations Group, 18 October 1983

1. [ ] Following from this morning's staff meeting:

25X1

- Ground will be broken for the new building in March. There are still some bureaucratic hurdles with the planning and zoning commissions.
- The I.G. Staff is looking into retirees who incorporate themselves as independent contractors. Apparently Jack Blake incorporated himself as some sort of beltway bandit and is getting a lot of Agency money, but a negative decision could affect a lot of others.
- Yale and MIT have complained about the Agency's policy regarding homosexuals and have barred Agency recruiters. John McMahon has set up a "sexual preference life style panel." S&T is supposed to have a representative, but there are no volunteers so far.
- DDO policy on clandestine, propaganda radios is still at issue. D/FBIS will meet with [ ] DO is putting pressure on [ ] to take a more pro-DDO stand. [ ] wants to be the only point of contact with IAD for the time being. If Dewey Claridge or anyone from Central America Task Force calls, refer him to D or DD/FBIS. Also, if it is necessary to check something out with DO, let [ ] know. [ ] apparently is getting a bit edgy; DO is not telling him what's going on, yet [ ] has designated him as the action officer on these broadcasts.
- Five S&T people have applied for FBIS rotations (engineers). We should not drag our feet in talking to them.
- OS reports that 15 percent of applicants knocked out in EOD processing go out for security grounds, including drugs.
- Urban league has provided a list of 300 names as possible recruits; the list will be winnowed down and we may be offered one or two.
- The Intelligence Authorization Bill will be taken up by Congress immediately after the recess is over. We may get our money soon.
- D/FBIS and DD/FBIS will be at a management conference for three days in November. First topic: "What I learned in 1983."
- The OMB hearings are today.
- An FBIS planning conference (on the 1986 plan) will be held on 3 November, probably at CoC.

**CONFIDENTIAL**

- will take over SDS next Monday.
- FBIS will have its own contracting officer by the end of the month.
- Full-time ODP support has been arranged--1-2 people through 1984 and some contractors. They will help with the Wang software and support to on-going activities.
